EXHIBIT A

Members of the Board of Adjustment,

We believe that the Board of Adjustment should grant this application to reduce the rear setback at 3436 Hillmoor Drive from 10' as required by Zoning Code, Chapter 138, to 8' because the absence of a screened lanai is an unnecessary hardship which is not shared by our neighbors as they and other homeowners in our community enjoy their screened lanais on a very regular basis. The screened lanai would not extend beyond the existing lanais on either side, as shown on survey, and would be built well within the rear lot line. It would not obstruct the view of other property owners. Your approval of this addition would in no way confer special privileges as stated above and shown in the accompanying pictures. The screened lanai would not negatively affect other owners properties or be detrimental to public interest. Quite the contrary, it will conform to existing screened lanais within the community. Our neighbors directly to the north and south have no objections to this addition, nor do other homeowners that are on the lake. The Brookhaven HOA Board of Directors has given their approval – letter enclosed.

Thank you in advance for your consideration.

Variance Argument Supplemental to Board of Adjustment Application

The variances being requested by the property owner are consistent with the purpose and intent of Section 138-113 of the Pinellas County Code of Ordinances. Specifically:

Special conditions: The special conditions which exist for this parcel relate to the land dedication which may be required along the north and west sides of the parcels. Although the requirements may be relaxed during the site plan approval process, currently a dedication of 40 feet along the north side and 30 feet along the west side are currently indicated. This dedication would require the dedication of over an acre or about eleven percent (11%) of the site.

No special privilege: There is no special privilege as similarly situated sites have received similar variances. Further, the PUD adjacent to the west has smaller lots and set back reductions as a result of the PUD district zoning.

Unnecessary hardship: The requirement by Pinellas County to dedicate right-of-way, absent the requested variances, would preclude the owner from developing the site with the density allowed under the residential urban land use category and the R-1 zoning classification. This reduction of density is not something a similarly situated owner would face that did not have the dedication requirement.

Minimum variance needed: The variances requested are reasonably calculated to be the minimum variances required to be able to utilize the property consistent with the R-1 classification. In the event that Pinellas County does not require the full dedication, the lots will be larger and the variances relaxed as applicable during the site plan approval process.

Purpose and intent compliance: The general intent, purpose and spirit of the Pinellas County Code is fully maintained by the grant of these variances. The lot sizes meet the R-1 classification and the variances are not creating a situation that would compromise the density and utilization of the site consistent with the code.

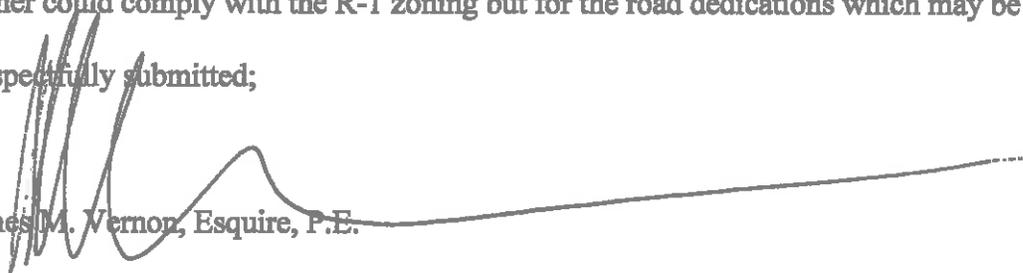

Detrimental to public welfare: The site is proposed to be developed pursuant to the Pinellas County development code and consistent with all public welfare requirements. The density is compatible with the future land use map and is less intensive than the developments abutting the site to the north and west. None of the variances create a risk to public welfare.

Increasing floor area, lot coverage restrictions: Not applicable.

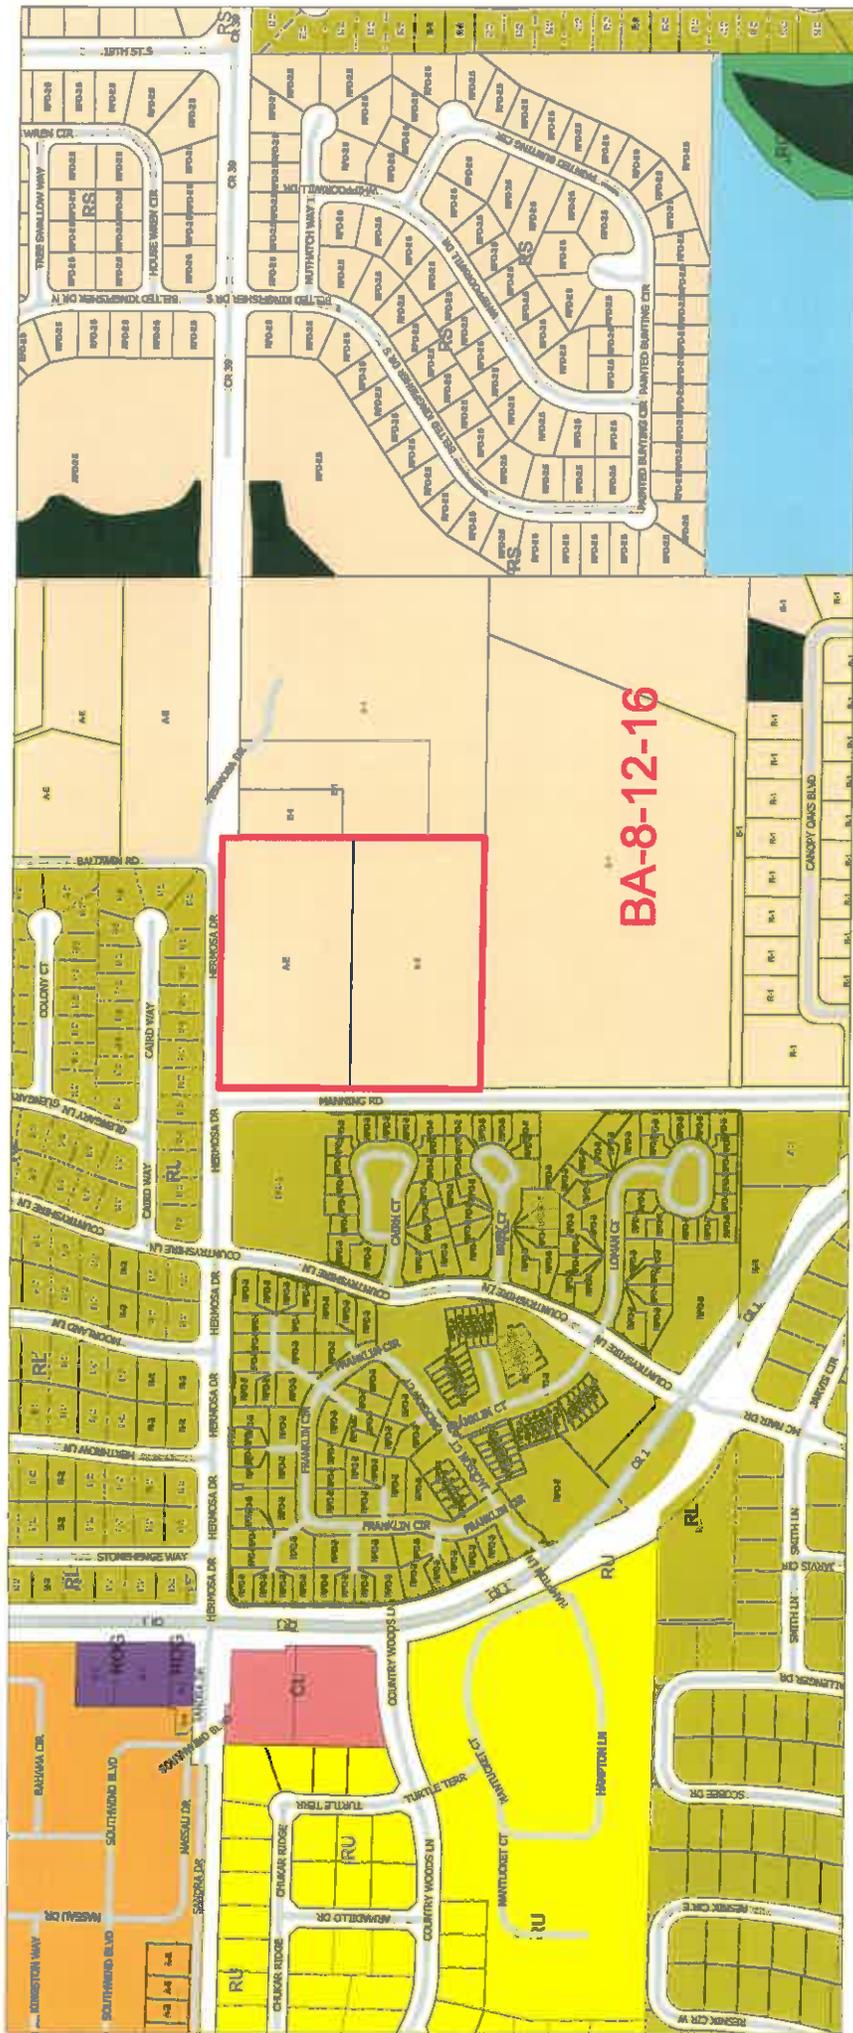

May not constitute an amendment: This request is not an amendment to any chapter of the Pinellas County Code of Ordinances, the Comprehensive Land Use Plan or the Countywide Comprehensive Plan.

Consideration of rezoning: A rezoning would not be appropriate to provide these requested variances as the R-1 zoning is the most dense and smallest lot zoning allowed in the residential suburban land use classification and no other zoning is available. As referenced above, the owner could comply with the R-1 zoning but for the road dedications which may be required.

Respectfully submitted;

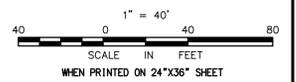

James M. Vernon, Esquire, P.E.

The issuance of a Flood Variance to construct a structure below the base flood level will result in an increase in insurance coverage premiums as well as increase risk to life and property. This information is provided to insure your awareness of the potential cost factors involved prior to your investment of time and money. It is suggested you contact your insurance agent to determine the effects a variance to the flood elevation requirements might have on flood insurance premiums.
